Summary:

Computer Science and Engineering student with hands-on experience in web development, backend systems, and AI/ML integration. Built web applications using React, Node.js, and Firebase, including features like real-time databases and Gemini AI API integration. Proficient in Python, C, and C++, with active project contributions on GitHub. Focused on learning through practical projects and solving technical problems with code.

Technical Skills:

Category	Skills
Programming	Python, JavaScript, C, C++ (basic)
Web Development	HTML, CSS, Bootstrap, JavaScript, React.js
Backend	Node.js, APIs, Python
Databases	MySQL, Firebase, Supabase
Tools	Git, GitHub, VS Code

Projects:

Campus Cloud Network | *Python, React.js, Flask, FastAPI, Gemini API, KNN, Supabase, PostgreSQL*

- Architected a full-stack, cloud-based smart campus management system using **React.js** for the frontend and **Flask/FastAPI (Python)** for the backend, supporting **1,000+ students** with **role-based access control** across **four user panels** (Student, Teacher, Admin, Guest).
- Developed an **AI-powered face recognition attendance system** using the **K-Nearest Neighbours (KNN)** algorithm in Python, achieving **65% accuracy**, eliminating proxy attendance, and reducing manual oversight by **70%**.
- Implemented **Supabase PostgreSQL** for relational data management and **Supabase Storage buckets** for .pkl model persistence, enabling scalable machine learning deployment with **99.9% uptime**.
- Integrated the **Google Gemini API** using Python for **PaperVista** and **AutoSlideX** modules, automating **question paper generation** and **PPT creation**, along with Google Search Engine API for image retrieval, reducing faculty workload by **60%** and saving **15+ hours per week**.
- Built a **Smart Career Guidance System** using machine learning-based aptitude analysis in Python across **five technical domains** (Operating Systems, DBMS, Compiler Design, OOP, and Programming), delivering personalized career recommendations to **500+ students**.
- Developed a **Student Forum platform** using React.js and Python, enabling public and private posts, real-time chat, and community interaction similar to social platforms, supporting collaboration among **1,000+ users**.
- Designed and deployed **RESTful APIs** using FastAPI and Python for **E-Canteen**, **E-Library**, and **Online Fee Payment** modules with real-time Supabase synchronization, handling **200+ daily transactions** and improving operational efficiency by **45%**.
- Created **NextStep CV Generator** using Python and NLP techniques to produce **ATS-optimized resumes**, achieving a **90% ATS pass rate** and enabling **300+ students** to generate professional resumes.

Certifications:

- [Oracle Cloud Infrastructure 2025 Certified Generative AI Professional](#) –
Oracle Certified Professional | Issued: September 2025 | Valid till: September 2027
- [Oracle Cloud Infrastructure 2025 Certified Data Science Professional](#) –
Oracle Certified Professional | Issued: September 2025 | Valid till: September 2027

Education:

Qualification	Institution / Board	Location	Score	Year / Status
Bachelor of Technology (BTech), CSE	Shri Vaishnav Vidyapeeth Vishwavidyalaya	Indore, MP	CGPA: 7.5	Expected July 2026
